There are still a couple of the old single truck Birneys in stock (body kit only, you supply power unit and trolley pole (such as Q Car pole below). \$25.00

Q Car

We found a few of the old Q Car O scale trolley poles that were recommended by the designer of our traction models. They are #B131, four spring back w/slider. Packages have a good deal off hurricane Floyd generated mud on them, but poles themselves are in good shape. \$8.00

Advice Needed:

As we expand our inventory, we would like to know what our customers would like to see us carry. We have an order in with Trainstuff LLC to start stocking their kits and expect to add BTS kits (and maybe detail parts) soon. Let me know what you would like to see us add to the lines we stock.

Also, what under construction portions of the website would you like to see activated next?
